
Mr. Silence-Stepless DC Inverter Pool Heat Pump

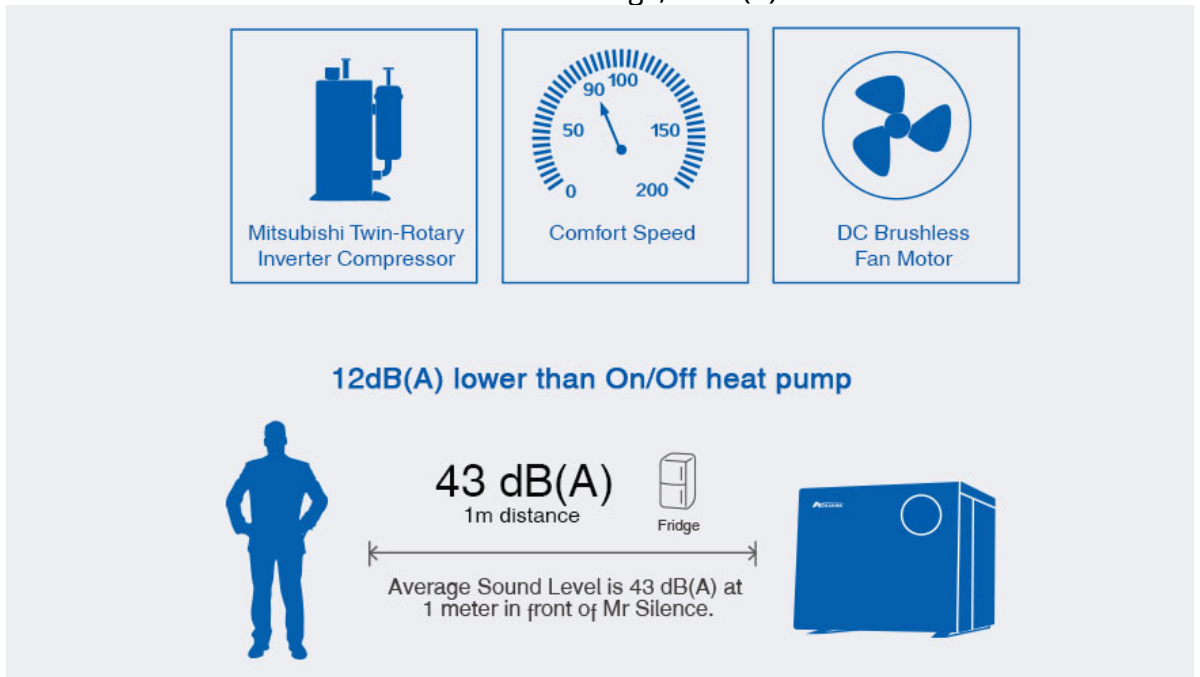

Patent Design

Mr. Silence Inverter Pool Heat Pump adopts unique slab design and simple classic touch controller, which bring both stylish appearance and user-friendly experience.

Simple Silence

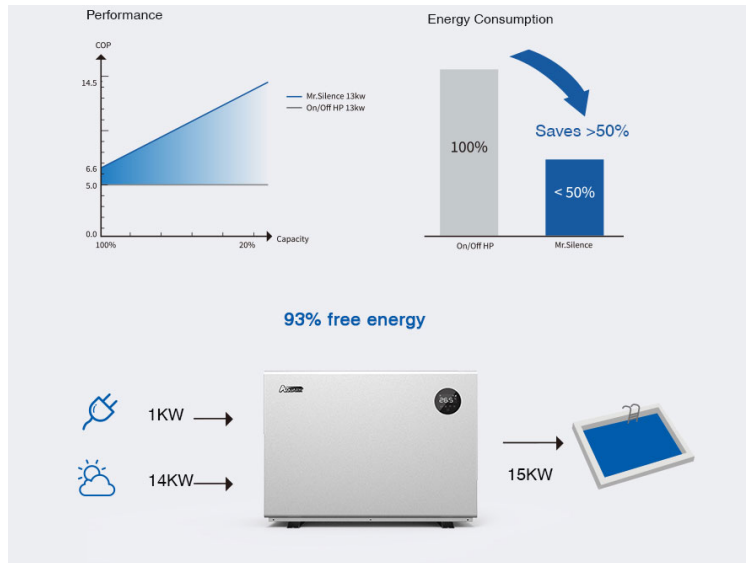

Thanks to the revolutionary air-stream design & stepless DC inverter system of Inverquark technology, the sound level of Mr. Silence is as low as a fridge, 12dB(A) lower than traditional On/Off heat pump.

COP up to 15

COP range 15-6.4 (Air 27°C/ Water 27°C/ Humidity 80%)

Thanks to inverquark technology, 1kw input brings up to 15kw output. When maintaining pool temperature in most of pool season, Mr. Silence is running by low speed which leads to the best energy saving performance and most silent pool environment. It's more than double energy saving compared with traditional On/Off heat pump.
